#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Betsui (5,037,336).

Betsui, figures 1 and 4E, discloses a connector comprising:

- a housing (10) having a terminal accommodating portion with opposite front and rear end and having cavities (11) extending between the ends for receiving terminal fittings along a connecting direction, a receptacle (13) surrounding the front end of the terminal accommodating portion;
- a separate front member (51) insertabale along an inserting direction into the receptacle and towards the front end of the terminal accommodating portion;
   and
- guiding means (19, 63, 69 and 23) between the front member and the receptacle for guiding the front member into the receptacle substantially parallel with the connecting direction.

Regarding claim 2, the separate front member is configured to form at least part of front ends of the cavities.

Regarding claim 3, the guiding means comprising at lest one rib (69) and at least

Application/Control Number: 10/722,671 Page 3

Art Unit: 2839

one groove (23) formed on opposed facing surface of the front member and the receptacle and slidably engageable with each other.

Regarding claim 4, Betsui, figure 1, discloses the guiding means comprising a plurality of pairs of ribs (63 and 69) and grooves (19 and 23). The ribs and the grooves in each pair having cross sections different from the ribs and the grooves in the other of the pairs.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1 and 5-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki (6,652,328) in view of Iwahori (6,048,226).

Suzuki, figure 1, discloses a connector comprising:

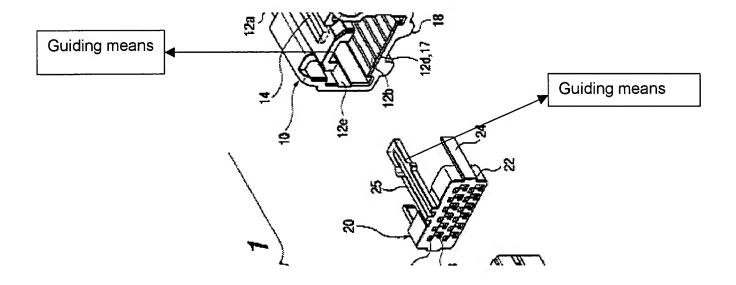

- a housing (10) having a terminal accommodating portion with opposite front and rear end, a receptacle surrounding the front end of the terminal accommodating portion;
- a separate front member (20) insertabale along an inserting direction into the receptacle and towards the front end of the terminal accommodating portion;
   and

ť,

Application/Control Number: 10/722,671

Art Unit: 2839

 guiding means (see a figure below) between the front member and the receptacle for guiding the front member into the receptacle substantially parallel with the connecting direction.

Suzuki discloses the instant claimed invention as described above except for the housing having cavities extending between the front and rear ends of the housing for receiving terminal fittings.

Iwahori, figure 1, discloses a connector (35) having terminal receiving chambers (45) for receiving male terminals (33) are formed in a housing (37). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Suzuki's connector housing to have the connector housing with terminal receiving chambers as taught by Iwahori, in order to align the terminals within the housing.

Application/Control Number: 10/722,671

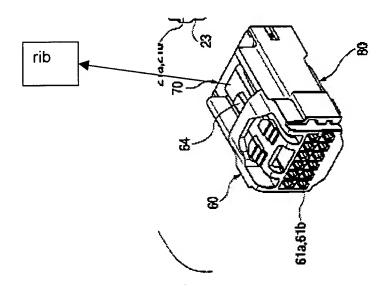

Art Unit: 2839

Regarding claim 5, Suzuki discloses a mating housing (60) fittable into the receptacle.

Regarding claim 6, Suzuki, figure 1, discloses the mating housing having a rib (see figure below) slidably engageable with the guiding means in the receptacle.

Regarding claim 7, Suzuki, figure 1, a shake-preventing portion (64) is disposed on the mating housing for becoming active towards the end of an insertion stroke of the mating housing into the receptacle.

Regarding claim 8, the shake-preventing portion is provided at a rear end of the rib of the mating housing.

Regarding claims 9 and 10, Suzuki, figures 1, 6 and 16, the housing is a male housing, the tabs (44) of the male terminals (40) project into the receptacle and the front member is a moving plate formed with through holes (23) through which the tabs can be passed.

Regarding claims 11-17, are rejected as the same as claims 1 and 5-10 above.

Application/Control Number: 10/722,671

Art Unit: 2839

#### Conclusion

Page 6

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh-Tam-T. Le whose telephone number is 571-272-2094. The examiner can normally be reached on 7:30-5:00.

- 6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached on 571-272-2092. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
- 7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
